

Zuvote

The pageantry platform

The problem

Beauty pageanties are common among Nigerian youngsters. Sometimes votes are made by payment either cash or transfer. Organizers pass through a lot to receive, compute and keep track of votes. Organizers have to sort through the stress of knowing which vote is meant for who. The images in the next slide will show you examples.

VOTE

N50
PER
VOTE

Vivian Amanze

TO BE THE GANG HOUSEMATE

SCREENSHOT PROVE AND SEND TO THE
CONTESTANT YOU ARE VOTING FOR.

YOU CAN VOTE AS MANY TIMES AS POSSIBLE.

N/B: N50 FOR 5 VOTES

Possible problems that may arise

- A confirmation message is sent, but the transfer bounced
- A vote is made but the voter forgot to send the confirmation message
- The organizer received thousands of votes via transfer, sorting through all this will be very burdensome.
- In general managing online competitions like this is very difficult.

How does my solution work?

I will like to approach this based on a step-by-step procedure.

- 1. A pageantry organizer registers and signs into the platform.
- 2. The organizer can then create a competition.
- 3. The organizer can register contestants for the competition.
- 5. After adding contestants and being satisfied, the competition can be set to active to permit voting.
- 6. Different people can visit the published url Vote online for their preferred candidate.
- 7. the organizer can apply for withdrawal of vote proceeds.
- **Note the platform takes care of the payment process and keeping track of votes.**
